Retail Analytics

Classification: Confidential

Our 17 year history assures best practice in privacy, security and the ethical use of data

We all have a responsibility to use data for good

Privacy

- We have built our business based on privacy by design principles for the past 17 years
- Quantum has strict protocols around the receipt and storage of personal information
- All information is de-identified using an irreversible tokenisation process with no ability to re-identify individuals.

Security

- We are ISO27001 certified - internationally recognised for our ability to uphold best practice standards across information security
- We use 'bank grade' security to store and process our data
- Comply with 200+ security requirements from NAB, Woolworths and other data partners
- All partner data is held in separate restricted environments
- All access to partner data is limited to essential staff only
- Security environment and processes regularly audited by our data partners.

Ethical use of data

Applies to all facets of our work, from the initiatives we take on, the information we use and how our solutions impact individuals, organisations and society.

Quantum believes in using data for progress, with great care and responsibility. As such please respect the confidence nature of this document.

Executive summary

01

Task 1

- The three highest contributing segments to the total sales are: Budget older families, Mainstream young singles/couples, and Mainstream retirees.
- Key Sales Drivers: Older families have the highest average number of packets purchased per customer. Mainstream young singles/couples represent the largest population segment.
- Target Store Strategy: Mainstream young singles/couples are more likely to buy Tyrells chips as compared to other segments.

02

Task 2

- A trial involving a new store layout was conducted in three trial stores.
- Control stores were created to represent the prior performance of the trial stores.
- The trial resulted in a significant increase in both the total sales and customer numbers with the new layout

01

Category

Older families and Young families tend to buy more chips on average as compared to other segments. Member types has insignificant affect on quantities of chips purchased

Most sales come from budget older families, followed by mainstream young singles/couples, and finally mainstream retirees

Sales via mainstream young singles/couples is attributed to their population being the largest of all the segments

Deeper Insight into the Mainstream Young Singles/Couples Segment

- Kettle chips are the most purchased brand across most segments.
- Mainstream young singles/couples are 28% more likely to buy Tyrells chips and 32% more likely to purchase 175g packets, which are exclusive to Twisties.
- Product Placement Strategy: Position Kettle chips and Twisties in areas highly visible to this segment.

02

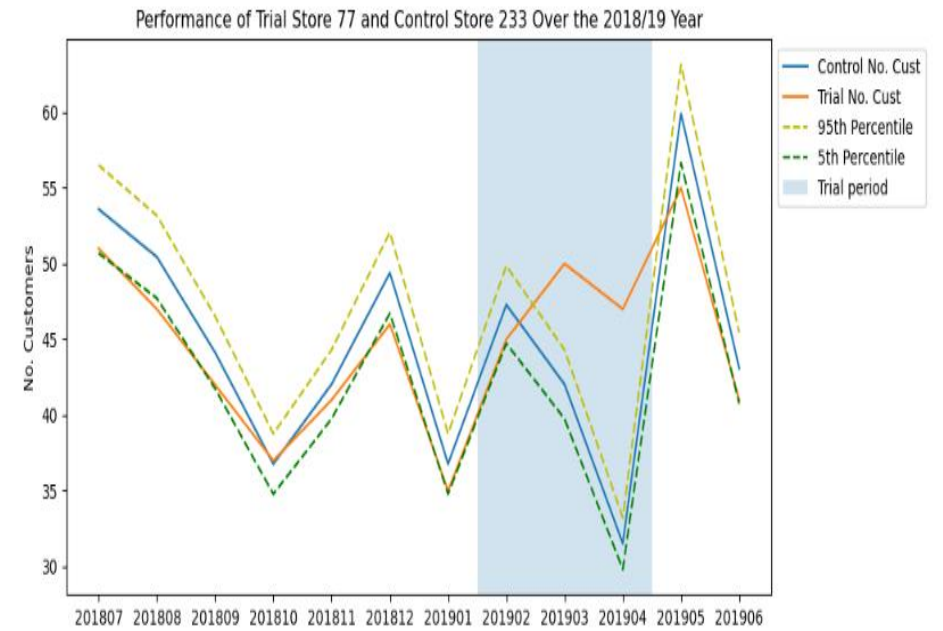

Trial store performance

The control store is created to represent the prior performance of the trial store as compared to the average of other stores. See example, stores 77 and 233

Trial store 77 and control store 233: trial success, with increases in sales and customer numbers.

Trial store 86 and control store 155: trial success, greater increase in customer numbers than sales. Need to check the trial implementation.

Trial store 88 and control store 40: no significant difference in performance
